

ERIC DECANINI

Android Developer

+ 44 7860 149 914 • eddecanini@gmail.com

WORK EXPERIENCE

Support Mentor for National Citizen Service (NCS) (Yet to Start) July – August 2019

- Will work with a group of young people (15-17 yr. olds) leading them as they go through adventurous activities, improvement workshops, and devise a local community project of their choosing
- First-Aid Training taken

Content Producer for Packt Publishing February – September 2018

- Structured outline relating to 'Firebase with Android Development'
- Produced video tutorials for viewers to use to learn how to develop various Firebase technologies with Android

Android Developer for Connected Cycle January – February 2018

- Improved existing RxJava code to allow an increasingly complex program to be easily readable, scalable, and maintainable
- Applied the Retrofit library to easily handle large JSON requests

Lead Android Developer at Class-ify School Assistant and Planner (Own Project) July 2016 – November 2017

- Majority of the app initially written in Java but migrated to Kotlin
- Implemented Firebase to create a back-end that includes a cloud database, authentication, and storage without the need to setup own servers
- Collaborated with a team of graphics designers applying material design principles to the app
- Applied various marketing techniques including ASO and studying user trends with Analytics
- Won the Gold Award in the Essex Digital Awards 2017 Mobile App Category and got featured twice on the Maldon & Burnham Standard newspaper and once on the Colchester Gazette

EDUCATION
